DWAER

Security for your site.

Technology for your business.

Gulf Circles Security Establishment

Integrated security and technology solutions, from equipment supply and installation through ongoing support and maintenance.

Who we are

Systems that work together

We start by understanding your site, your team, and the systems you rely on.

We supply and support security, networks, communications, software, AI call answering, and WhatsApp Business.

We work with creativity, honesty, and integrity. We select the right technology and apply our expertise to help customers grow.

Integrated systems

Equipment that works together

Careful installation

Designed around the site

Ongoing support

Maintenance and technical help

Security starts with trust.

Connected systems for your day-to-day operations.

Vision and mission

How we work

Our vision 01

To be the region’s first choice for reliable, innovative integrated security systems.

Our mission 02

To use the latest security technology to deliver solutions that prioritize protection and quality.

Our values

Creativity

Solutions tailored to each project

Honesty

Clear communication

Integrity

Follow-through at every stage

Our solutions

Integrated security and technology

We choose and integrate equipment around how your site operates.

01

Surveillance and security

Integrated surveillance helps you monitor your premises and protect your assets.

02

Access control and attendance

Manage who can enter your premises and track staff attendance.

03

Networking and infrastructure

Wired and wireless networks and local or cloud servers to keep your organization connected.

04

PBX and communications

Business phone systems and video intercoms connect your team with customers and visitors.

05

Fire alarm systems

Configure fire detection and alerts around the needs of your site.

06

Audio and video

Professional sound, home theaters, displays, and satellite reception.

Site security and access management

Surveillance and access control

Surveillance and security

SECURITY & SURVEILLANCE

Integrated surveillance helps you monitor your premises and protect your assets.

- Indoor and outdoor CCTV cameras
- Intrusion alarms
- Fixed and PTZ cameras with night vision options
- Recording and monitoring systems
- Surveillance installation and maintenance

Access control and attendance

ACCESS CONTROL

Manage who can enter your premises and track staff attendance.

- Electronic gates
- Entry and exit control
- Biometric time clocks and attendance tracking
- Installation and configuration

Infrastructure and communications

Keep your teams and systems connected

Networking and infrastructure

NETWORKS & INFRASTRUCTURE

Wired and wireless networks and local or cloud servers to keep your organization connected.

- Wired and wireless network setup
- Wi-Fi coverage improvements
- Supply, installation, and maintenance of local and cloud servers
- Technical support for virtual work environments
- Network firewalls

PBX and communications

COMMUNICATION SYSTEMS

Business phone systems and video intercoms connect your team with customers and visitors.

- Analog, digital, and IP business phone systems
- Video intercom systems
- PBX programming and customer service setup
- Reporting and call recording where supported
- PBX maintenance and support

Alarms and audiovisual systems

Fire alarms, audio, and video

Fire alarm systems

FIRE ALARM SYSTEMS

Configure fire detection and alerts around the needs of your site.

- Assess fire alarm requirements
- Supply system equipment
- Install and connect alarm components
- Test the system and hand it over

Audio and video

AUDIO & VISUAL

Professional sound, home theaters, displays, and satellite reception.

- Ceiling, wall, and waterproof speakers
- Home theaters, projectors, and screens
- Audio and video equipment for conference rooms
- Wi-Fi, Bluetooth, and networked audio systems
- Digital and IP satellite reception and distribution

Software and digital solutions

Digital tools for your business

Software, apps, websites, AI, automation, and graphic design for your organization.

07

Custom software

Connect your data and simplify operations with software built for your workflows.

08

Mobile apps

Give your customers easier access to your services with a mobile app designed for your project.

09

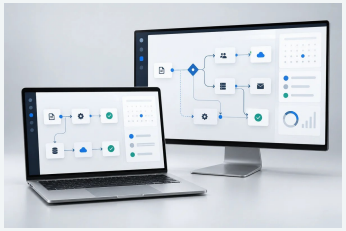
Website development

Fast, responsive websites that reflect your brand and are easy to manage across devices.

10

AI solutions

Digital assistants and tools for working with documents, organizational knowledge, and data.



11

Automation solutions

Connect your systems and spend less time on repetitive tasks.

12

Graphic design

Consistent visual identity and creative materials for print and digital channels.

Software and digital solutions

Custom software and mobile apps

Custom software

CUSTOM SOFTWARE

Connect your data and simplify operations with software built for your workflows.

- Requirements analysis and user experience design
- Operations, customer, and request management systems
- Dashboards, reporting, and user permissions
- System, database, and external service integrations
- Testing, documentation, support, and ongoing development

Mobile apps

MOBILE APPLICATIONS

Give your customers easier access to your services with a mobile app designed for your project.

- iPhone and Android development
- Arabic interfaces and accessible user experiences
- Integrations with backend systems and services
- Accounts, notifications, and project-specific features
- Device testing and app store submission preparation

Software and digital solutions

Websites and business AI

Website development

WEBSITE DEVELOPMENT

Fast, responsive websites that reflect your brand and are easy to manage across devices.

- Company websites and online portals
- Responsive layouts across devices
- Content and request management tools
- Performance and technical search optimization
- Form and service integrations and hosting options

AI solutions

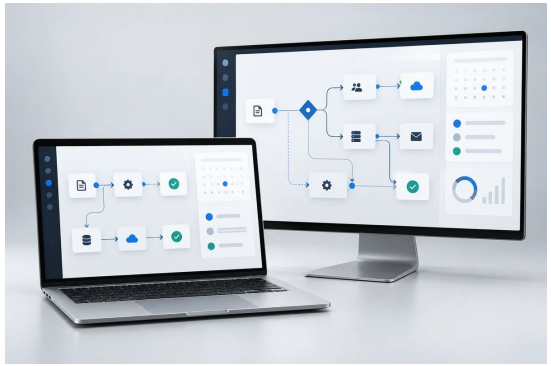
AI SOLUTIONS

Digital assistants and tools for working with documents, organizational knowledge, and data.

- Digital assistants for customers and teams
- Search across company documents and knowledge
- Extract and classify information from documents
- Connect AI tools to existing systems
- Evaluate outputs and control access and usage

Software and digital solutions

Automation and visual identity



Automation solutions

BUSINESS AUTOMATION

Connect your systems and spend less time on repetitive tasks.

- Automate request intake and record updates
- Connect applications, services, and databases
- Schedule reports, alerts, and reminders
- Route approvals and assign tasks
- Monitor workflows, handle errors, and retry failures

Graphic design

GRAPHIC DESIGN

Consistent visual identity and creative materials for print and digital channels.

- Logo design and visual identity
- Color, typography, and brand guidelines
- Social media posts and campaign materials
- Company profiles, presentations, and print materials
- Production files for digital channels and print

AI call answering

AI call answering for business

A voice assistant that speaks Arabic and English and connects your phone system to approved company information and workflows.

Answer and route calls

The agent answers using approved information, collects details, and routes callers to staff based on branch, hours, and service.

Connect calls to business systems

Integrate CRM and ERP systems through available interfaces with scoped permissions. Lookups, bookings, and updates require approved tools and confirmed results.

Review call quality

When configured, recordings, transcripts, and summaries support evidence-based quality reviews and coaching. Reports help teams evaluate operations and campaigns.

Answer, route, and review calls.

Help callers reach the right next step.

We pilot one use case and test answers, transfers, and failures. Accuracy and availability depend on the setup, infrastructure, and integrations.

Discuss your call setup

Unified WhatsApp with WAAPI

One WhatsApp number for your team

Authorized WAAPI agent in Saudi Arabia

Share one inbox

Assign conversations to staff or teams, add private notes, and review customer history. Permissions and ownership tools help avoid duplicate replies.

Use AI replies with staff handoff

The assistant answers from approved information and pauses or hands off as configured. Automate routine steps, run campaigns using approved templates, and track delivery.

Configure your workspace

We review your number, channels, and team size to select the plan, permissions, and integrations. Staff can use the web or mobile. We test the setup before launch.

WAAPI.chat

Customer conversation platform

Users, numbers, and limits depend on the plan. Meta message fees are separate. Ask for setup and subscription pricing. A 9200 number is arranged separately.

Request activation for your unified number

Project delivery

From consultation to ongoing support

We agree on the requirements, design the solution, and help your team keep it running.

01

Understand your needs

We discuss your goals and review the site and operating requirements.

02

Design the solution

We propose the right equipment and define the scope of work.

03

Install and commission

We install and test the systems, then hand them over ready to use.

04

Provide ongoing support

We help keep your systems running with technical support and maintenance.

We tailor the scope and installation to the way you use your systems.

Suppliers and technology brands

Technology selected for each project

Selected brands for security, communications, networking, and audiovisual systems.

- Hikvision
- Cisco
- Panasonic
- Honeywell
- Bose
- Samsung
- Avaya
- Siemens
- ZKTeco
- HP
- Sony
- Yamaha
- Jablotron
- Lilin
- THX
- Zeta
- Bowers & Wilkins
- Epson
- Canon
- Ericsson
- Onkyo
- Televes
- Triax
- Paradox
- Humax
- Commax

Equipment selection depends on project requirements. Displaying a brand does not imply exclusive representation or accreditation.
